## ABOUT ME

Hello! My name is Jesica, but everyone calls me 'Bachi'. I have worked in programming for 6 years, mainly in backend, but I consider myself a generalist programmer because I have acquired a lot of knowledge about frontend throughout these years.

I enjoy working as a team, learning as I find ways to overcome the challenges of each project.

My main experience is in the development of desktop applications, but I am also interested in developing web pages and video games.
